The value of the benefits in €

As an example for the great benefits. An annual pass for recreational paddling costs 410 € and for very frequent training and competing paddlers 730 €. An investor with 400 shares can buy three annual passes for the family and thus save 1,5 x this cost annually! Simply put - lend to invest will pay off only because of this. Also, you get accomodation to a discount, also benefiting your friends.

Benefits are valid every year, and transfered to new shareholders when shares are sold. This will increase liquidity of shares and thus, their value.

* Each cabin has 6 beds - the discount benefits all in the cabin. If available. Prebooking is necessary.
